RE: Technical Revision, Daniels Sand Pit #2, Permit No. M1973-007SG

Dear Mr. Cazier:

On September 20, 2017 I sent you a Notice to Import Inert Fill into Daniels Sand Pit #2 and on September 22, 2017 I sent a technical revision (TR) for the Daniels Sand Pit #2 Permit number M1973-007SG to revise the approved reclamation seed mixture to include QuickGuard sterile seed.

We, Transit Mix Concrete Co. and Continental Materials Corporation, intended to submit the two as part of the same Technical Revision document. As you have already received both documents and the Division requires a Notice to Import Inert Fill Affidavit to accompany the TR, I have included that Notice to Import Inert Fill with this letter.

Please accept this letter submission as a modification the TR application submitted on September 22, 2017.

Please contact me if you have any questions.

Respectively,

Brandon Heser
Aggregate Production Manager

Encl: Notice to Import Inert Fill Affidavit

AFFIDAVIT:

I/We, Brandon Heser, hereby certify that the material proposed to be imported to the Daniel's Sand Pit #2 (East Pit Area), is clean and inert as defined in Rule 1.1. (20).

Rule: 1.2.(2), states clean and inert material is any material which is, "...non-water – soluble and non-putrescible solids together with such minor amounts and types of other materials, unless such materials are acid or toxic producing, as will not significantly affect the inert nature of such solids. The term includes, but is not limited to, earth, sand, gravel, rock, concrete which has been in a hardened state for at least sixty days, masonry, asphalt paving fragments, and other inert solids."
