Technical Revision No. 8 (TR08), Adequacy Review**

Dear Mr. Hart,

The Colorado Division of Reclamation, Mining, and Safety (Division), received the above referenced technical revision application on October 3, 2017. The Division is required to issue a decision on the application by November 2, 2017. The following items must be addressed prior to the Division's approval of TR08.

1. The revised Reclamation Plan Map submitted with TR08 must be signed by a registered land surveyor, professional engineer, or other qualified person in accordance with Rule 6.2.1(2)(b).
2. There are two scales shown on the TR08 Reclamation Plan Map; a bar scale and an "Original Scale". Please revise this map with one scale that shall not be larger the 1 inch=50 feet nor smaller than 1 inch = 660 feet in accordance with Rule 6.2.1(2)(e). The bar scale on the submitted map is smaller than that allowed by the rule.
3. TR08 proposes a new seed mixture to be used for Cells 2 and 18. The revised Reclamation Plan Map legend indicates these cells will be seeded with "Seed Mix #1" that was approved with Amendment No. 2 (AM02). Please revise the map and legend as appropriate to indicate Cells 2 and 18 will be seeded with the revised TR08 seed mixture.

This concludes the Division's review of TR08. The decision date for this application is November 2, 2017. If you need additional time to address the adequacy review items listed above, please send a written request to waive your right to a thirty (30) day decision. If you have any questions feel free to contact me at (303) 866-3567, extension 8120.
