RE: Sprague Stone, M-2015-006
Active Mining Areas

DIVISION OF RECLAMATION
MINING AND SAFETY

Dear Mr. Ebert:

Coffey Engineering & Surveying (Coffey) is submitting this letter in pursuit of operational area for Sprague Stone, as described in *Sprague Stone LLC, Construction Material, Regular (112) Operation, Reclamation Permit Application DRMS File No. M-2015-006*, dated May 2015. The Operator seeks to open up active mine areas according to the attached Exhibit F.2 Phase 2 Phasing Map for Future Permitting and Reclamation.

The total new area to be opened for mining is 4.4 acres and is shown as parcel numbers 18, 27, 28 and 32 on the attached Exhibit F.2 Phase 2 Phasing Map for Future Permitting and Reclamation. The permit acreage (62.4 acres) is not increasing by opening active mining areas.

According to the current permit documents referenced above, the total cost per acre for reclamation is \$1,923.00 (Exhibit L Reclamation Costs). Therefore, enclosed with this letter is a check for \$8,461.20 to account for the increase in the active mining areas of 4.4 acres.

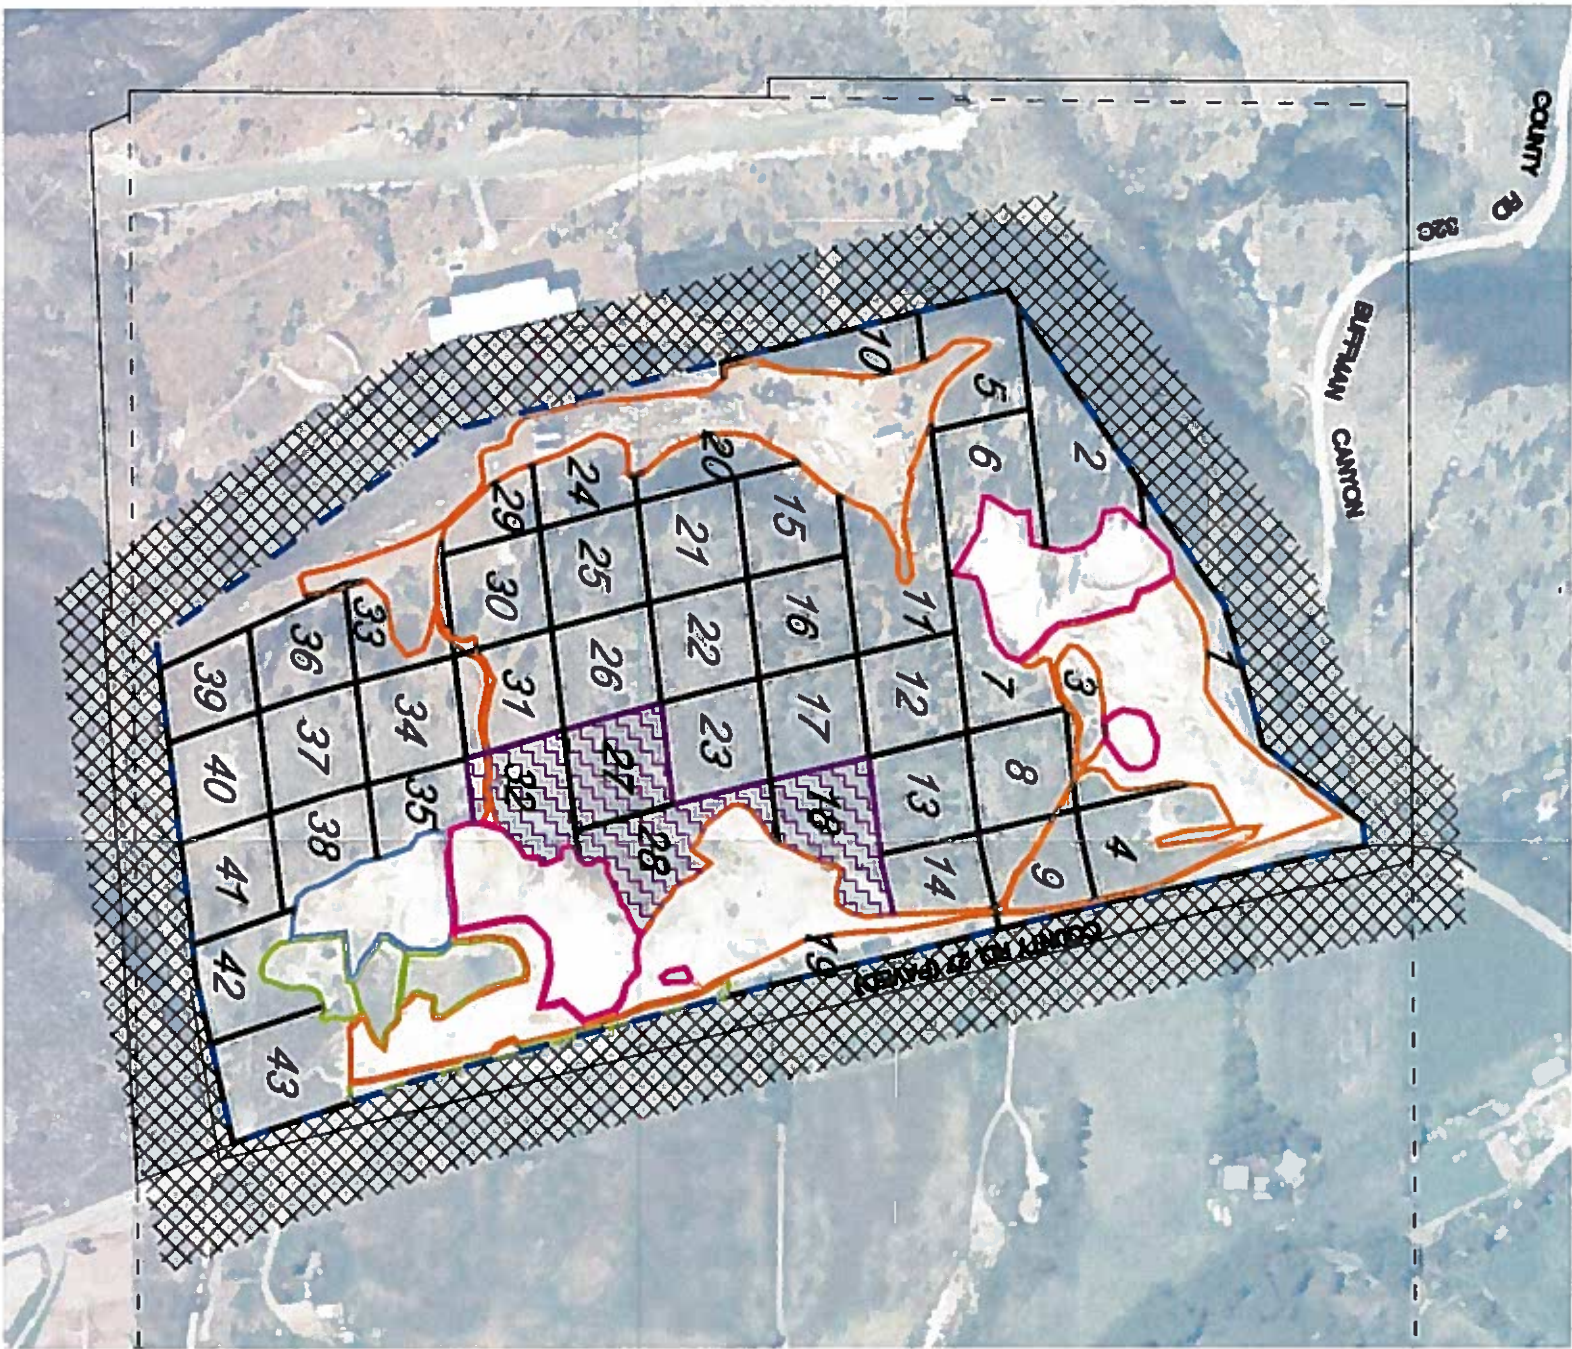

If you have any questions or need additional information, please don't hesitate to contact our office at 970.622.2095.

Sincerely,

Coffey Engineering & Surveying, LLC

Troy Campbell, PE
Project Manager
