Amy Eschberger:

Re: Gold Hill Mill, Permit No. M-1994-117

These photographs were taken yesterday, October 26, 2017, inside the Gold Hill Mill's tailings pond to confirm that the tailings placed in the pond by the previous operator have been lowered to meet the requirement for two feet of freeboard.

I have been working on the Weed Management Plan for the Gold Hill Millsite, but have not been able to finish it by the end of today. I need some additional time to research several aspects of managing the weeds in this area. Therefore, I would request an extension until Friday, November 10, 2017, to complete the Weed Management Plan for this permit. Please let me know if this will be acceptable.

Mark,

Thanks for sending the pics. These will be sufficient for me to call the freeboard problem abated. Also, I acknowledge receipt of your extension request for the weed control corrective action. I'll send you something more official next week.

Thanks,

Amy Eschberger
