Hello Michael:

This email serves as notification that, as of October 31, 2017, Cotter has achieved the required dewatering elevation of 150 feet below the Steve Adit. Cotter will continue to dewater the mine until a depth of approximately 200 feet below the Steve Adit. For long-term operations, Cotter will maintain the mine water level between 170 and 190 feet below the Steve Adit.

If you have any questions, please contact me.

Cheers,

Stephen J. Cohen, PG

Mill Manager
