Jared: Aggregate Industries began work with the original contractor, Core 4 Services, on November 23, 2016. That is the week they began mobilization of equipment onto the site and excavation started. Aggregate Industries completed work on the Orr Drain on September 22, 2017 when the replacement contractor, DCP Civil regraded the Orr Drain area to increase the depth and flow for better drainage. I have attached invoices for your review. Thanks, Mike
