Thank you Mr. Refer,

Per the approval of AM01, Aggregate Industries must submit to the Division within 60 days of the completion of the permanent drain a certification created by a qualified engineer certifying that the permanent plan has been constructed to the required design, compaction and specification approved through AM01. Given the September 22, 2017 completion date of the drain, this certification is due November 21, 2017.

Also, please provide an explanation why it took about 10 months to complete the construction of the drain? Also, what action, if any, were taken to mitigate the off-site flooding while construction of the drain was occurring?
