**Re: Pikeview Quarry, Permit No. M-1977-211
Preliminary Adequacy Review, Technical Revision Application TR-19**

Mr. Hesar:

On November 6, 2017, the Division of Reclamation, Mining and Safety received the fee and application for the Technical Revision (TR-19). The revision requested the following:

Import inert earthen material for placement in the mined out portions of the pit.

The submittal was called complete for the purpose of filing on November 8, 2017. **The decision date for TR-02 is December 8, 2017.** Please be advised that if you are unable to satisfactorily address any concerns identified in this review before the decision date, it will be your responsibility to request an extension of the review period. If there are outstanding issues that have not been adequately addressed prior to the end of the review period, and no extension has been requested, the Division may deny this TR. The following comment is based on the Division's review of the request for TR-19:

- 1) The affidavit included with the submittal lists the "Daniel's Sand Pit #2 (East Pit Area)" instead of the "Pikeview Quarry". Please submit a new affidavit with the correct pit name.

If you have any questions, please contact me (303-866-3567 ext. 8169).

Sincerely,

Timothy A. Cazier, P.E.
Environmental Protection Specialist
