Hello,

I, among others, would like to voice opposition against the Transit Mix Concrete's application of #2017-049. The proposed quarry would greatly disturb some important wildlife habitat that many specialist species rely on in this region, and could pollute water sources trickling down from these foothills. Of important note is the endangered Spotted Owl which nests sparingly in this region, and anything we can do to conserve this species should be given special attention too.

Thank you for taking this email into consideration
