**Re: Lamar Pit, Permit No. M-1987-079, Technical Revision (TR-02), Adequacy Review**

Ms. Schreiber:

On January 3, 2018, the Division of Reclamation, Mining, and Safety (Division) received your Technical Revision request (Revision No. TR-02) for the Lamar Pit, Permit No. M-1987-079. The Division has identified the following adequacy items that need to be addressed before an approval of TR-02 can be issued:

- 1) The permittee proposes to import clean dirt, construction waste, and aged concrete to be placed in the mined out sections of the pit for backfill material. If the aged concrete contains non-epoxy-coated rebar, please discuss the handling procedures to minimize oxidation (removal, reduction of exposure, etc.).
- 2) The Division understands that an affidavit certifying the material is clean and inert will be signed prior to each backfill importation campaign. However, in accordance with Rule 3.1.5(9)(c), please submit an affidavit now signed by the permittee, ensuring that any materials imported to the site for backfilling will be clean and inert.

This concludes the Division's adequacy review for Revision No. TR-02. Please be advised, Revision No. TR-02 may be deemed inadequate and the request denied on **February 2, 2018** if the permittee fails to address the above listed adequacy items to the Division's satisfaction by that date. If additional time is needed to submit a response, an extension request must be received by our office by the decision date of February 2, 2018.

If you need additional information, please contact me by telephone at 303-866-3567, ext. 8129, or by email at [amy.eschberger@state.co.us](mailto:amy.eschberger@state.co.us).

Sincerely,

Amy Eschberger
