Hi Jared,

The information in the Structures section of the Knox Pit application is missing a number of structures that are on my property within 200 feet of LRM's proposed operations. Structures currently listed for my property are one residence and one outbuilding. This is the full list:

1. Residence
2. Three Outbuildings
3. Three Registered Wells
4. Fences
5. Taylor and Gill Ditch
6. Little Cache La Poudre Ditch
7. Headgate Structure on Little Cache La Poudre Ditch
8. Qwest Telecommunications Line
9. Verizon Telecommunications Line
10. LaPorte Water and Sanitation District Sewer Line

Understanding that the utilities and ditches belong to their respective owners, it goes without saying that any damage to them would involve damage to my property.

Please note also that there is a high-voltage power line and pole/ cell tower on LRM's property within just a few feet of my property line, and about 70 feet from one of my buildings. If the stability of that structure is compromised it would present a catastrophic safety issue in addition to major damage on my property.

Thank you!

Jayme

Good morning-

There also are two access roads on my property.

Thanks.

Jayme
