Subject: Permanent Man-Made Structures

Dear Mr. and Mrs. Tilley,

We are reviewing and verifying the locations of all valuable and permanent man-made structures located within two hundred (200) feet of the proposed mining permit boundary for the Loveland Ready-Mix Knox Pit application. Your email dated February 22, 2018 to DRMS states you own additional structures within 200 feet of the proposed permit boundary. Attached is an aerial photograph showing the structures we have located and verified to be within 200 feet of the permit boundary and property line.

As you can see, even though we previously identified your residence on Exhibit C, Pre-Mining Plan, your residence is over 200 foot from the proposed permit boundary for the mining site.

We are not sure if the small plastic covered enclosure located approximately 60 feet from the property line is a permanent structure, however, we are happy to add it to the number of outbuildings shown on the Pre-Mining Plan.

The structures associated with Taylor and Gill Ditch, Little Cache la Poudre Ditch, and Qwest/Verizon telecommunications lines have all been identified and Structure Agreements have been sent to the appropriate owners.

We are unable to identify any other permanent man-made structures within 200 feet of the property line at this time except your fence on the east side of your property. However, if you feel there are additional structures that need to be identified please contact us and we would be happy to send out someone to locate and measure their locations.

The best way to reach me is by email or my cell phone number listed below.

Thank you

William Katz
