**Re: Simla Highway Pit, Permit No. M-1995-095;
Technical Revision Approval, Revision No. TR-1**

Dear Mr. Schuler:

On March 5, 2018 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on February 27, 2018, addressing the following:

Allow entryway and adjoining access road to the south to remain after reclamation.

The terms of the Technical Revision No. 1 approved by the Division are hereby incorporated into Permit No. M-1995-095. All other conditions and requirements of Permit No. M-1995-095 remain in full force and effect. The Division has reviewed this change for impacts to the financial warranty and has determined that this change does not require an increase to the current reclamation liability.

Please be aware the approval of this revision does not remove the entryway and adjoining access road from the existing permit boundary. An acreage reduction/partial release request is required to remove any area from the permit. A copy of this form is attached for your convenience.

If you have any questions, please contact me.

Sincerely,

Timothy A. Cazier
Environmental Protection Specialist
