RE: Annual Fees and Report

Greetings,

Weed spraying was completed on May 20<sup>th</sup>. Vast reduction in all areas with the exception of the entrance which borders a neighboring property to the south. The County has been in contact with all neighbors in a combined effort to reduce the spread and irradiate.

There have been no changes from the previous year so a map is not included. Stockpile volumes are being depleted opening up the area they have been stacked in. This area has a deposit of materials that will be mined (21+ feet) before any new area opened up. The alluvial deposit is adjacent to and east of the permanent scale. Continued sales of stockpiles are anticipated to deplete what materials are left in the coming season.

Thank you,

A handwritten signature in black ink, appearing to read "Rick Noland". The signature is fluid and cursive, with the first name "Rick" and last name "Noland" clearly distinguishable.
