Subject: MR173 plants TR70 fence

Hi Jennifer

I have reviewed MR 173 and they are fine as far as plants go. I also wanted to ask about the de-watering stuff they did down by the train load-out in T3N, R 101W, Section 22. I had a permittee call and he said they have ripped out a bunch of fence for that project and it has not been replaced. Can you check with someone at BME and see what is going on with that project and find out if they are going to replace the fence?
