**RE: Stegner Farms, DRMS Permit No. M-1999-021
Technical Revision No. 7 (TR07), Adequacy Review No. 1**

Dear Mr. Wooldridge,

The Colorado Division of Reclamation, Mining, and Safety (Division), received the above referenced Technical Revision application on March 16, 2018. The following items will need to be addressed prior to the Division's approval of the application:

1. In accordance with Rule 6.4.6(a), the revised reclamation plan map must show the proposed topography of the area with contour lines of sufficient detail to portray the direction and rate of slope of all reclaimed lands. Please revise the reclamation plan map accordingly.
2. In accordance with Rule 6.4.6(b), please portray the final land use for the reclaimed area above the projected high water line. The reclamation plan indicates these areas will be revegetated with the approved seed mixture.
3. Please label which berms will be left as permanent berms.
4. Please ensure the revised reclamation plan map conforms to the map requirements of Rule 6.2.1(2).

The Division is required to issue a decision to approve or deny the TR07 application by April 16, 2018. If you need additional time to address these issues, please submit a written statement waiving your right to a thirty (30) day decision. If the decision date arrives and there are outstanding adequacy review issues and we have not received this written statement, the Division will deny the TR07 application. If you have any questions feel free to contact me at (303) 866-3567, extension 8120.

Sincerely,

Jared Ebert
Environmental Protection Specialist III
