Denver, CO 80246-1530

Taylor Hukari  
Sand and Gravel Permits

Enclosed is the quarterly DMR for Permit #502113, the Agnus Dei Lode Claim. DMR states "no samples taken," for the third quarter of 2017. There is still only one active hand dug pit within the one acre permitted area. Silt fence reinstalled at this site rips within one season due to high winds at this site. A berm above the dig is now reinforced with safety fencing and diverts stormwater away from the dig site. Another berm below the dig site is reinforced with wire fencing to prevent any rocks or stormwater runoff from leaving the site. No samples taken.

Sincerely,

A handwritten signature in black ink that reads "Jean Cowman". The signature is fluid and cursive, with the first name "Jean" and last name "Cowman" clearly distinguishable.
