RE: Nolte Pit #1, Permit No. M-2012-016, Inspection Problem Abated

Dear Mr. Whiteman:

On December 20, 2017 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Sediment control was cited as a problem because the lack of stormwater maintenance and excessive erosion. Corrective actions required that you submit a technical revision to include a stormwater management plan which addresses the maintenance and prevention of excessive erosion by the corrective action date.

On March 13, 2018 the Division received a technical revision request (TR-3). The request revised the reclamation plan and added a stormwater component to address erosion issues. TR-3 was approved on April 20, 2017. This satisfies the corrective action and the problem is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me. Amy Yeldell, at the Division of Reclamation, Mining and Safety, 1313 Sherman St., Room 215, Denver, CO 80203. Direct contact can be made by phone at 970-254-8511 or via email at amy.yeldell@state.co.us

Sincerely,

Amy Yeldell
