RE: Financial Warranty Extension Request, Pueblo East Pit, Permit File No. M-2000-041

Mr. Russell,

Fremont Paving and Redi Mix, Inc. and Stonewall Springs Quarry have been working over the last several weeks to finalize plans for the construction of the slurry wall at the Pueblo East Pit. Through this effort, we have discovered a few areas that needed further survey work and changes in design. We have requested our surveyor update our topographical mapping of the site so that we have a much more accurate design for the slurry wall. In addition, we are working with Deere & Ault to redesign the spillway from the Roller Compacted Concrete design to a Grouted Riprap design. These additional issues have made it difficult to meet the deadline for the increased financial warranty. I would like to request an extension to June 29th, 2018 to post the additional financial warranty for Technical Revision (TR-04).

Please let me know if you need additional information or have questions regarding this request.

Sincerely,

Jodi Schreiber
Chief of Operations
