MINING AND SAFETY

RE: Spec Agg Quarry M-1974-004, TR03 Adequacy Review Response

Dear Mr. Cunningham:

Martin Marietta will provide the Division with the results of the leak test within 30 days after they are available. The leak test started April 5<sup>th</sup> and we anticipate submitting data to the State Engineer mid-July and hope to get a response back from them late-August. If the leak test shows the water in the pit is impounded groundwater, we will file the appropriate permit revision to account for the exposure of the groundwater.

Please let me know if anything additional is needed at this time.

Sincerely,
