COMMENTS: The applicant has requested a financial warranty reduction for the permitted 9.9-acre site. The proposed post-mining use of the site is rangeland.

The site has been regraded, topsoiled, and seeded to resolve issues identified in previous DRMS inspections. According to previous comments provided by this office, mining operations at the site were not anticipated to expose ground water.

Based on the above, this office has no concerns regarding the requested financial warranty reduction. The applicant may contact the State Engineer's Office with any questions.
