Tim,

For the pond liner that is outlined in green in the response to corrective actions I sent over on May 14th, our intent is to remove what is loose and not covered by vegetation by the June 19th corrective action date. We would like to not disturb any vegetation that is in the bottom of the pond or in areas where it is on top of liner at this point in time and keep the pond in place to help pull sediment out before it heads down the valley. We will of course fill and completely reclaim the pond upon closure and final reclamation in accordance with the current approved reclamation plan.

I hope this answers your question. If not I can make some time available tomorrow morning for a call to hopefully clear this up further.

Thank You,

Brandon Hesper

Brandon,

Please clarify the response on the pond liner. Is the intent to remove the liner outlined in green by the corrective action due date? Reading the response, it was not clear to me whether that would occur now or during final reclamation. My understanding talking to Bruce was the liner removal was something that would occur soon.

The Division considers the problem cited for grading the road to be resolved. Thank you for jumping on that in a timely manner.

Tim,

I have attached to this email our responses to the inspection report you sent for Snyder Quarry, received March 21, 2018. You will see in the response that Problem #1 has been resolved and we have prepared a response for Problem #2 which you may or may not have already spoken with Bruce Humphries about. We would be happy to have further discussion on Problem #2 as necessary.

Hard copies will be placed in the mail this afternoon.

Thanks,

Brandon Hesel
