

## **INTEROFFICE MEMO**

**To:** Janet Binns  
**From:** Rob Zuber *Rob D. Zuber*  
**Date:** 5/21/2018  
**Subject:** Bowie 2, TR115 review – second adequacy

I looked at the Stover and Associates responses (letter from Tamme Bishop dated May 18, 2018) to my TR-115 adequacy comments (memo to you dated April 17, 2018). **All of my adequacy comments were sufficiently addressed.**

In particular, I now agree with them: the half culvert design should be left in the design within their PAP. This allows for a contingency if future issues arise with the “smart ditch.”
