OBSERVATIONS

This inspection was conducted as part of the Division of Reclamation, Mining and Safety's (Division) normal monitoring program. The prospector, Paul Allred, was present during this inspection. Photographs are included with this report in order to illustrate some of the conditions observed.

The Pay Dirt site is located approximately nine miles northeast of Naturita, on the north side of the San Miguel River. The site is accessed by private drive from 90 Road on the north side of the bridge.

The prospecting takes place on pre-disturbed lands. The operation consists of screening river gravels through a Grizzly, and then running the sands through a sluice plant. The operation appeared to be following the plan proposed in the NOI. No problems or violations were noted during this inspection.

Responses to this inspection report should be directed to Dustin Czapla at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 South 3rd Street, Room 301, Grand Junction, Colorado 81501, phone number (970) 243-6299.
