To: "Ebert - DNR, Jared" <jared.ebert@state.co.us>

Jared,

As we discussed this morning, I discussed this issue with my boss and due to the fact that access to the specific area that needs attention is difficult and conflicts with the golf course will need to be minimized, and the fact that we didn't have funds budgeted in 2018 to do the improvements we are requesting some time to get money budgeted, develop a scope of work and implement the embankment modifications so that we are in compliance with the DRMS. We are hoping to do complete some work on a sewage lagoon in that area between November 2018 and February 2019 and would like to request that we can make the embankment improvements at that time. That would allow us to get money budgeted and develop a scope of work to get this work completed. Completing the work during this time would also minimize golf course / park disruptions and maximize safety.

Subject: Debetz Pit, M-1977-283, Corrective Action Due 5/30/2018

Hello Kurt,

The corrective action required from the attached inspection report is due tomorrow. I wanted to check on the status of the slope repair and stabilization?

Thank you,

Jared
