Mr. Travis H. Marshall

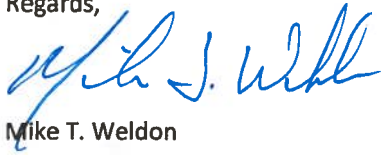

Colorado Div. of Reclamation, Mining and Safety

Permit No. M-1999-007

Mr. Marshall,

Per our conversation on the phone, I am having a terrible time getting a survey scheduled for the permit conversion from our 110c to a 112c. I am requesting a 90 day extension so that I may get the survey and all appurtenant information gathered. The survey companies are extremely busy and are scheduled far in advance. If you could grant this extension we feel confident that we could complete the necessary work in that time frame. Thank you for your consideration.

Regards,

Mike T. Weldon
