Hi Jared,

I got your voice mail about a status update on our Superior S&G mining permit.   Our new employee has just started and he and I have had a chance to walk the site so he has an idea of what we are needing to do.   He is scheduling a meeting with the consultant we will hire to add some components to the proposal he gave us, and I think it would be good if he and I met with you, if you are ok with that.   The idea is to get him off on this project on good footing. He will have questions since he hasn't' worked on a project related to a mining permit, as will the consultant, so if you can take a little time to meet out there with us that would be great.   The 3 eaglets have not officially fledged yet, so we can't get as close to things as we might like. We would like to wait for them to fledge so we can be really specific about the work plan. Are you ok waiting to meet out there until After July 4?   That isn't an official date but they were born a bit early so we expect them to be gone a bit earlier than the official date of July 30.

Thank you for the update. We can meet at the site after July 4th. My schedule is open July 9, 10, 16, 18, 19 or 20.

Jared
