OBSERVATIONS

This inspection was conducted as part of the Division of Reclamation, Mining and Safety's (Division) normal monitoring program. Jeff Schlabach, representing the Operator, was present during this inspection. Photographs are included with this report in order to illustrate some of the conditions observed.

The Hollenbeck Pit is located approximately five miles east of Gunnison and accessed from CR42. The site is a 110c operation that includes a total of 9.9 permitted acres. The Division currently holds a financial warranty amount of \$19,029.00 for this site.

The mine identification sign was posted at the entrance to the site.

The affected area was marked by t-posts.

The site has seen minimal activity since the Division's June 2016 inspection. The operator has continued to clean up the site and to backfill the highwall with extra material from the mining operation. Several materials stockpiles are located on the mine bench.

There is no fuel storage on site.

Noxious weeds were not observed on site.

Overall, the permit area is well kept. No problems or violations were noted during this inspection.

Responses to this inspection report should be directed to Dustin Czapla at the Division of Reclamation, Mining and Safety, Grand Junction Field Office, 101 South 3rd Street, Room 301, Grand Junction, Colorado 81501, phone number (970) 243-6299.
