Good morning Mr. Cazier – attached is a correction to the recent annual report submitted to the DRMS for the Snyder Quarry, M1977-210. Question #5 was incorrectly checked as no. The site does operate for more than 180 days per year. We continue to sell from the on-site product stockpiles. We understand from Rules 1.13.2(1), (4) and (5) (there are personnel at the site off and on during any 180 day period, there are personnel with loaders to load sold material from product stockpiles, and there continues to be the sale of material from stockpiled materials), that the site is not in temporary cessation.

Please let me know if you have any questions and we apologize for the error and any trouble this may have caused the Division.
