RE: Mesa Gravel Pit (Permit M-1982-036) - 2018 Annual Reclamation Report

Ms. Mitchell

Enclosed are the Mesa Gravel Pit Annual Report and Map pursuant to C.R.S. 34-32-116 of the Colorado Mined Land Reclamation Act. The Annual Reclamation Report Map for this reporting period shows mining and reclamation activities at this facility through 2014, which was the last activity at this location, and the 112c Annual Report responds to information requirements, as noted on the completed form for the prior twelve-month period.

During a recent inspection, the CDRMS representative noted that it may be appropriate to file a revision application for "Intermittant Operation". PSCM will review the applicable regulations, any future plans, and if appropriate, will prepare and submit a Technical Revision application addressing this change.

A check in the amount of \$791.00 is being processed by our Accounts Payable Group, and will be forwarded on receipt.

Please feel free to contact me at 970.870.2712 with any questions.

Best regards,
for Peabody Sage Creek Mining, LLC
