Reclamation Material Balance (2017-2018)

Alpine Aggregates' Steamboat Sand and Gravel Pit has made a cut of approximately 560,505 yards over a surface area of 18 acres. A total of 362,175 yards of material would be required to restore the current cut to the contours of the approved reclamation plan. The Steamboat Sand and Gravel Pit has 196,426 yards of fill stockpiled and 473,792 yards of reserve material remaining in the pit's floor which can be utilized as reclamation materials, if necessary. Thus, the current total available material on site for reclamation of 308,044 yards. Therefore, there is an adequate volume of material on site to complete reclamation at the current stage of mining.

Sincerely,
ALPINE AGGREGATES, LLC
