**Re: Trapper Mining Inc., Permit No. C-1981-010, Technical Revision TR-121
Johnson/Pyeatt Coal Stockpile
Responses to DRMS Comments, Adequacy Review 1**

Dear Mr. Bowles:

Please accept this letter as our response to the adequacy review letter dated July 11, 2018. Items requiring a response have been copied below, Trapper's comments follow each as applicable.

Revised permit materials have been included as follows:

Page; 3-184

Maps; M6 (Sheet 2) and M13A (Sheet 2)

DRMS Comments July 11, 2018

1. Please update Map M06 (sheet 2 of 3) Bond Worst Case Year 2014 to show the adjusted disturbance boundary for the new coal stockpile.

Trapper Response: The additional disturbance anticipated with the stockpile construction has been added to map M6 as requested.

2. Map M13A (sheet 2 of 3) Facilities was submitted with the application. The stockpile location is identified on the map and labeled as 'proposed'. Please remove the word 'proposed' from the map. This will eliminate confusion after the revision has been approved

Trapper Response: The label has been revised as requested on Map M13A.

3. The text on the submitted page 3-184 states that perimeter ditches and dozer basins will be utilized to contain the drainage. Please include a reference to the typical design you will utilize to construct the perimeter ditch and dozer basin.

Trapper Response: References have been added to page 3-184 as requested.

Please contact me if you have any questions regarding the enclosed information.

Sincerely,

A handwritten signature in cursive script, appearing to read "Graham Roberts".

Graham Roberts
Environmental Engineer
