Amy,

Fyi. Right now is the time to order bugs and the insectary has a government customer form. I ordered the bindweed mites/moths for Midwestern; apparently two bags will take care of our site. The person in charge of the Tamarisk beetles will call to discuss the area and potential of releasing the beetles along the Arkansas. However, the gentleman I spoke with said they are actively looking for sites along Arkansas River to release Tamarisk beetles.

Request-A-Bug

Fees

Biological pest control agents are seasonally available to help suppress weed and insect pests in Colorado. They can be requested by private landowners in the State, or other governmental agencies concerned with controlling the spread of exotic invaders. Supplies can be limited and vary from one year to the next; thus, the Insectary cannot guarantee a release for each request submitted.

Please **Do Not Send Payment Now** (with your request). We will contact you to arrange for payment and shipping arrangements in season.
