

Notes:

The effective date of all information is September 21, 2018.

We continued to remove material from stockpiles and the mined area. No additional area was mined or reclaimed this year. The mine was inspected on January 30, 2014, the bond was evaluated and determined to be adequate.

9. A small area covering 0.17 acres was stripped of vegetation and partially mined this year. This is area previously disturbed but had not been mined for a number of years

10. No reclamation is required at this time.

15. This mine was opened before 1976 and the original operator did not save topsoil. We continued to mine the area he stripped until 2009 when we opened a new area on the east side of the mine. Topsoil from that small area has been stockpiled around the stripped area for use in reclamation.

22. Please refer to the 2018 Annual Report Map for location of the areas of disturbance in the mine.
