Re: Revenue Mine, Permit No. M-2012-032, Technical Revision Approval, Revision No. TR-010

Dear Mr. Briggs:

On September 27, 2018 the Division of Reclamation, Mining and Safety approved the Technical Revision application submitted to the Division on August 16, 2018, addressing the following:

- *Technical revision to allow for construction of an already CDPHE permitted five-stage passive treatment system with surface water discharge at a new industrial wastewater outfall (Outfall 002A), allow for construction of a new monitoring well to monitor passive treatment system and allow for diesel tank to be moved to a less congested area.*

The terms of the Technical Revision No. 10 approved by the Division are hereby incorporated into Permit No. M-2012-032. All other conditions and requirements of Permit No. M-2012-032 remain in full force and effect.

The currently held reclamation liability amount of \$476,269.41 is adequate to cover the costs of the required reclamation in the approved reclamation plan.

If you have any questions related to this correspondence please contact me at (970) 241-2042.

Sincerely,

Travis Marshall
Environmental Protection Specialist
