Good afternoon Jared,

Thank you for the opportunity to comment on the Goddard Pit #1. Our goal in responding to land use proposals, such as this project, is to provide complete, consistent, and timely information to all entities who request comment on matters within our statutory authority.

Upon internal review of the proposed referral request and of the potential biological occurrences on this parcel, Colorado Parks and Wildlife has no biological concerns regarding this matter. We concur with the wildlife assessment that common wildlife species could occasionally use the site but it does not have any known habitats for T&E species.

If you have any further questions, or if this proposed development changes in timing or scope, please contact me or Kyle (cc'd). Finally, please continue to reach out to us for comment on future applications, as we strive for responsible land development while protecting sensitive species and their habitats.

Cheers,

**Brandon B. Marette**

Jared,

Thanks for sending this and for working on a system to get these notices emailed to us so we have more time. I'm copying Brandon Marrette so he can do a desktop review of the site, and he'll email you back if there are any concerns.

I look forward to talking with you further on this topic.

Hello Mr. Kroening,

Just an FYI, these notices were generated by our admin staff while I was out of the office at the end of last week. Here is a notice for a proposed operation near Julesburg. I know the public comment period ends today, but we will take any comment into consideration if there are any wildlife issues after the close of the public comment period.

I am hoping to meet with my supervisor and our IT staff to work on an e-mail system to get you guys noticed quicker on these new permit applications. But I have not been able to coordinate a time to meet with all of them yet. Stay tuned and we will likely reach out over the next several weeks to work on this.
