Denver, CO 80203

RE: Snyder Quarry (a.k.a. Black Canyon), Permit No. M-1977-210; Corrective Action Field Work Completion.

Dear Mr. Cazier:

Transit Mix Concrete Co., on behalf of Continental Materials Corporation, is informing the Division that the corrective actions required at the Snyder Quarry were completed on or about October 2, 2018. With the completion of the reclamation of the Water Supply pond, and regrading the upper access road, we believe we have completed the following, required corrective actions.

INSPECTION TOPIC: Roads

PROBLEM/POSSIBLE VIOLATION: Problem No. 1: The road between Phases WP and AP is in especially poor condition requiring a four-wheel drive vehicle and careful navigation of the road.

CORRECTIVE ACTIONS: Provide photographic evidence of road repair and maintenance to remove/repair the erosion rilling in the road designated as a fire escapeway by the Corrective Action Due Date.

CORRECTIVE ACTION DUE DATE: 5/21/18

This work was completed and signed off by Mr. Cazier on June 18, 2018.

INSPECTION TOPIC: Reclamation Success

PROBLEM/POSSIBLE VIOLATION: Problem No. 2: The water storage pond added for the rock wash plant as part of amendment 2 (AM-02) is in poor condition due to lack of maintenance, with the liner torn and ineffective.

CORRECTIVE ACTIONS: Reclaim the water storage pond as approved by the Division in Amendment 4. Provide photographic evidence of removing the liner prior to any backfill placement, followed by photographs of achieving final grades, and seed tags for the revegetation effort or if appropriate, a schedule for later seeding in 2018 by the corrective action due date.

CORRECTIVE ACTION DUE DATE: 6/19/18

For problem number 2 cited in the Inspection Report, please note the attached photographs, seed tags, and reclamation contractor invoice document the corrective actions taken at the water supply pond. In addition, some erosion control mats were added to help with slope stabilization during seed establishment.

In the original seed mix submitted to the DRMS as part of the corrective actions, mountain mahogany was not listed. We included mountain mahogany since it is in the site approved seed mix. Also, it is an abundant shrub surrounding the site and within the basin side slopes of the water supply pond.
