Re: Permit No. M-1977-348, Boettcher Limestone Quarry, Approval of Technical Revision No. 9

Mr. Dease:

On October 26, 2018, the Division of Reclamation, Mining and Safety (Division) approved the Technical Revision application submitted to the Division on September 12, 2018, addressing the following:

Revise groundwater monitoring program to include sampling for parameters from CDPHE, WQCC's Regulation No. 41 Tables 1-4 at all monitoring wells, and comparing the analytical results to the most restrictive Table Value Standards when reported to the Division.

The terms of the Technical Revision No. 9 approved by the Division are hereby incorporated into Permit No. M-1977-348. All other conditions and requirements of Permit No. M-1977-348 remain in full force and effect.

While the intent of this revision is to provide additional information on existing groundwater conditions at the site, the Division reserves the right to pursue enforcement actions or to require additional permit modifications at any time in accordance with the Construction Materials Act and Rules. Given the operator's recently expressed desire to seek final release of the site, the expanded sampling program and reporting approved in this revision will be helpful in assessing whether reclamation has been achieved at the site so that existing and reasonably potential future uses of groundwater are protected as required by Rule 3.1.7(8).

If you have any questions, you may contact me by telephone at 303-866-3567, ext. 8129, or by email at amy.eschberger@state.co.us.

Sincerely,

Amy Eschberger
