**Re: Martin Marietta Materials, Inc., Riverbend Operation, File No. M-2000-016,  
Technical Revision No. 3 (TR-03) Adequacy Review**

Ms. Mikulas,

The Division of Reclamation, Mining and Safety (Division/DRMS) reviewed the content of the technical revision (TR-03) submitted on October 22, 2018 for the Riverbend Operation and submits the following comments. The Division is required to make an approval or denial decision no later than November 21, 2018 therefore; a response to the following adequacy review concerns should be submitted to the Division as soon as possible.

1. The Operator states the appropriate permits from the Colorado Department of Transportation (CDOT) and the Federal Highway Administration (FHWA) are being pursued through both agencies. The Division will require the Operator to submit copies of the final approved permits from CDOT and FHWA prior to approving this technical revision. The Operator expects the permits to be obtained in January 2019, based on discussion with the Division. The Division recommends the Operator submits an extension request to extend the decision date until February 1, 2019 to allow time to obtain and submit the permits.
2. The Division estimated the costs associated with the demolition and disposal of the conveyor bridge structure at \$79,900.00. A copy of the estimate is attached for review.

If you have any questions, please contact me at [peter.hays@state.co.us](mailto:peter.hays@state.co.us) or (303) 866-3567 Ext. 8124.

Sincerely,

Peter S. Hays
