

# Figure 5

There were no Surface Water analytical results for Windy Gulch in 2018.

Sample Locations:

- 1) WGL
- 2) 9360 Basin
- 3) 9700 Weir
- 4) WGU

Refer to Map G-3, Appendix 4 for sample locations.

Windy Gulch is an ephemeral stream and typically only flows in the spring (April/May) in years when there is sufficient snow pack to create runoff.

\* Due to an extremely low snowpack and extreme drought conditions in 2018, there was no surface water in Windy Gulch.
