RE: Prince Albert Mine, Permit # M-2011-040
BLM: COC #75092 Prince Albert Mine Plans of Operations.

Notice of Return to Active Status;

Rimrock Exploration and Development, Inc. wishes to return to active status and remove this permit from temporary cessation.

The Current price of Vanadium has justified beginning a sampling program to determine the Vanadium to Uranium reserves in the mine. This activity requires the mine to be ventilated and possible rehabilitation of tunnels. Surface disturbances will not happen until conventional mining begins.

Rimrock will notify the DRMS and the BLM prior to production or making any significant surface disturbances that will require a change in bonding.

Thank you,

Alan Chiles
President
