**Re: Citizen Complaint Resolved (CT-01)**

---

On August 9, 2018, the Division spoke with Ms. Virginia Stewart who submitted a complaint to the DRMS general email inbox on July 12, 2018. The Division also spoke with Mr. David Valdez with Colorado City Metropolitan District (Operator). It was Ms. Stewart's understanding the Operator was recently given permission to mine Lot #14, west of the current permit boundary which encompasses Lot #15. The Operator has not applied for an amendment to expand the current permit. The Operator stated they also do not intend to apply for an expansion of the permit to Lot #14. The Division informed Ms. Stewart of what the current permit allows the Operator to mine (only Lot #15) and that no application to expand the mine has been submitted. Ms. Stewart stated she was satisfied and that the complaint could be considered resolved.
