RE: Adequacy Review Response, Technical Revision (TR-04), Barnhart Pit, Permit File No. M-1984-008

Dear Mr. Lennberg,

Following is the Transit Mix Concrete Co./Continental Materials Corp. (TMCC/CMC) response to the Colorado Division of Reclamation, Mining and Safety's (DRMS) adequacy question, dated November 30, 2018. The DRMS adequacy question is in italic font and TMCC/CMC response is in plain text.

Question 1:

Please clarify if the proposed TR-04 seed mix will or will not replace the wetland seed mix approved by the Army Corp. of Engineers and the Division's in TR-03, for areas around the lakes located at the site?

Response:

The proposed seed mix WILL NOT replace the wetland seed mix. Its use will be limited to those areas outside the wetlands areas which are not under Corp. of Engineer jurisdiction. The wetland seed mix approved in the Division's TR-03 and by the Army Corp. of Engineers will remain the same for those areas around the lakes.

Respectfully,

Brandon Heser
