
Legend

All Land outside Affected Land Boundary
is UNDISTURBED by mining

ACTIVE MINING AREA - includes mining, processing,stockpiling, distribution, normal access routes, and other activities directly related to mining. 139.9 ac

OVERBURDEN STRIPPED AREA - land where soil and overburden have been removed but no actual extraction has yet occurred. 27.5 ac

OVERBURDEN/BACKFILL AREA - locations where stripped overburden has been placed for storage or permanently placed as backfill. 49.2 ac

TOPSOIL - locations where stripped topsoil has been placed for storage or permanently spread. 12.4 ac

TOPSOIL/REVEGETATION - locations where stripped topsoil has been placed for storage or permanently spread. *But planted with final vegetation.* 14.2 ac.

SEDIMENT BASIN/BACKFILL - locations where sediment was placed from washing or sediment accumulates from runoff. Usually defaults as backfill. 15.8 ac.

LAND MINED IN THE LAST YEAR - 1.25 ac

Acreage Accounting:

Affected Land =	299.0 ac
Classified Land =	- 260.8 ac
Unclassified Land =	38.2 ac

(Classified Land fits in one of the categories in the legend.
Unclassified Land is affected land that would fit multiple uses or is a setback boundary.)
