**SUBJECT: Planning Review: Re. No Impact Technical Revision (Appendix A - 8.B) of Cripple Creek and Victor Gold Mining (CCV) Permit No. M-1980-244; Cripple Creek & Victor Gold Mining Company; Cresson Project; - TR #110 Power Pole Installation**

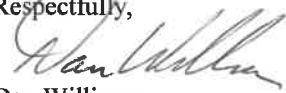

Dear Mr. Raglin and Ms. Dehlin:

The Teller County Planning Department has completed its review of the Newmont Mining Corporation's (CC&V) Technical Revision TR # 110 – Power Pole Installation

1. Teller County understands that this TR is required by the Division of Reclamation, Mining and Safety (DRMS).
2. The modification being proposed by CC&V involves the installation of three phase power by Black Hills Energy from the Ironclad distribution line to existing warehouses lying northeast of the Squaw Gulch Leach Facility. The installation will consist of nine 45-foot tall power poles that will carry 2,315 feet of power line. Poles crossing or adjacent to haul roads will provide a minimum of sixty foot overhead clearance for haul truck traffic. The proposed power line will remain entirely inside the CCMOD and will parallel existing roads, pits and overburden stockpiles.
3. Teller County has reviewed TR #110 against the standards contained in Appendix A, CCMOD, sections 8.A and 8.B and finds that it is compliant with that section and is compliant with Section 2.F.g for height in that the 45 foot poles are less than 50 feet [ for any portions visible outside the CCMOD]. Additionally, no additional lighting has been requested as part of the power pole request.
4. The installation of these power poles is therefore a 'use by right' inside the CCMOD.
5. Teller County concurs with TR # 110 as written.

If you have any questions, please contact me at (719) 686-5414 or email [williamsd@co.teller.co.us](mailto:williamsd@co.teller.co.us).

Respectfully,

  
Dan Williams  
The Teller County Planning Official
