RE: Korinek #1 Pit, Permit M-1979-131, Incomplete Application for Transfer of Permit and Succession of Operators, SO-01

Dear Mr. McCuiston,

On December 31, 2018 the Division of Reclamation, Mining and Safety received your responses to our incompleteness letter dated December 4, 2018 for permit M1979-131.

The following items are incomplete for the application to be processed:

1. Structure Agreements not provided per instructions or Statement not applicable. In review of the permit boundary using Google Earth Pro it was noted that there are a couple of power poles to the south, a County road that is routed around the permitted area, and a couple of houses also near the southern boundary of the permit area.

Please provide the above documents by February 2, 2019. All completed permit documents are required to be submitted for consideration of your Request for Transfer of Mineral Permit and Succession of Operators Application. An incomplete application will be denied after the 60 day submittal request, if requested documents or information are not received.

If you need additional information or have any questions, please contact me by telephone at 303-866-3567 x8114, or by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
