RE: Cash and Who Mine Permit No. M-1983-141: Weed Control Management Plan Report

Amy Eschberger:

Attached to this letter is a copy of a map of the Cash and Who Do Mine sites, the access roads to these sites, and the area around the Third Level Cross-cut, showing all of the areas within and near the permit boundaries that were sprayed for weeds during the past year. On August 23 and 31, 2018 two employees spent a total of 31.5 man hours spraying along the access road to the Cash and Who Do Mines, the entire area around the Cash and Who Do Mine Dumps, and both access roads down to the Third Level Cross-cut. The lower access road was sprayed down to the lower entrance road. All of the access roads were sprayed for a distance of thirty feet on both sides of the roads. A total of 17 gallons of herbicide were used during this weed control exercise. Roundup and Curtail are the brand names of the two herbicides sprayed on the weed infestations. Canadian thistle and Spotted/ Diffuse knapweed were the main weeds that were sprayed for during this time period.

Canadian thistle & Knapweed / Cash & Who Do Mines / 5 acres of Infestation / Springtime / Springtime / Spraying / High Priority.

Canadian thistle & Knapweed /Cash & Who Do Mines / Thin to Dense depending on location / Very Vigorous in certain areas and thinner in other areas depending upon cover./ 15.75 Hours were spent with 2 men spraying for a total of 31.50 man hours.

The weed management spraying appears to have been successful, but it will be done earlier in the year in 2019.
