Re: Yevoli Cobblestone Pit, Permit No. M-2007-003; Conversion Approval, Revision No. CN-1

Dear Mr. Yevoli:

On January 17, 2019 the Division of Reclamation, Mining and Safety approved the Conversion application submitted to the Division on September 18, 2018, addressing the following:

Increase area by 73.52 acres to 83.5 acres consisting of 41.6 affected acres with a maximum allowed disturbed area (for bonding purpose) of 11 acres.

The terms of the Conversion No. 1 approved by the Division are hereby incorporated into Permit No. M-2007-003. All other conditions and requirements of Permit No. M-2007-003 remain in full force and effect. During the permit conversion review process, the Division accepted the following commitments for this operation:

- 1) The active highwall length will be no longer than 200 feet in order to minimize bonding requirements,
- 2) The Permittee will abstain from conducting mining operations in Area 7 until creek crossing engineering designs for any access/haul roads are submitted and approved by the Division as part of the permit revision process

The Division accepted the \$58,905.00 revised bond estimate included in Exhibit L prepared by Greg Lewicki And Associates. This revised liability amount exceeds the financial warranty currently held (\$34,925.00). The revision will not be final until the additional bond (\$23,980.00) is approved by the Division.

Please sign the enclosed Performance Warranty and return it to the Division for the Director's signature. Once the Director signs it, the completed Performance Warranty will be returned to you.

Sincerely,

Timothy A. Cazier, P.E.
Environmental Protection Specialist
