Tim,

Yesterday at 10:30 am, a neutral water spill occurred at the High Grade Mill when a pipe leaked outside of secondary containment. Approximately 400 gallons of process water was spilled outside of containment but over liner. The area was over-excavated and impacted material brought to the mill feed stockpile area.

In accordance with Rule 8, a 5-day follow up notification will be provided to the Division.

Please let me know if you have any questions,

Thank you,

Justin Bills
