Colorado Division of Reclamation, Mining and Safety

**RE: 2018 Annual Report Supplemental Information
OWL SWD Operating, LLC dba Oilfield Water Logistics
OWL Western Gravel & Disposal
Rio Blanco County**

To Whom It May Concern,

On August 25, 2016, the DRMS approved an acreage release of 171.06 acres subsequently reducing the facility to 20.77 acres. On February 06, 2018, we communicated the discrepancy with Travis Marshall who advised the change would need to be made through the IT department. Since transfer to the electronic filing of the annual report the autofill has not changed the facility acreage from the previous 191.83 acres. Could you advise the steps that need to be taken to amend the inaccuracy? We are unsure how this may impact the annual permit fee or bonding for the facility.
